Future World IP: Legal Responses to the Tech Revolution

"Finding the Limits of Exhaustion", Denver Law Review's Future World IP: Legal Responses to the Tech Revolution, Denver, CO, February 2016.

Under the first sale doctrine, intellectual property rights are exhausted after the authorized first sale of a product. However, from GMO seeds to iTunes, emerging technologies have pushed the limits of exhaustion doctrine. Moreover, as products increasingly cross national borders, exhaustion has taken on an international dimension. The panel will discuss how exhaustion law has evolved to date and its future.
