Preventing Corporate Espionage: Risks Posed by Mobile Device Use by Employees

Thursday, October 1, 2015-

[John Moyer](#), a technology attorney at Kilpatrick Townsend, and [Larry Ponemon](#), Chair of the Ponemon Institute, joined [Audra Dial](#), Corporate Espionage partner at Kilpatrick Townsend for our continuing Corporate Espionage webinar series. Mr. Moyer and Mr. Ponemon discussed the growing risks posed by employees using mobile devices in the workplace and provided best practices to prevent the loss of information through mobile devices.

Mr. Ponemon, whose Ponemon Institute is a thought leader in field of data security and privacy, provided an overview of his institutions January 2015 survey, "The Security Impact of Mobile Device Use by Employees," summarizing how employees in the workplace view the use of mobile devices and the potential risks to corporate information created by such use.

Mr. Moyer provided a range of "practice pointers" for companies looking to protect their most valuable intellectual property in light of the growing use of mobile devices in the workplace.

The following topics were discussed:

- Overview of the growing importance of proprietary confidential information, and general risks posed to such information in an employment setting
- Employees' increasing use of mobile devices in the workplace: what the statistics show
- Risks posed by employees who are increasingly using mobile devices
- Best practices to avoid data breaches and misappropriation in the workplace
