“Consent” is considered to be a cornerstone of most privacy-based frameworks and regulations. In a rapid response to GDPR & CCPA and growing consumer expectations for privacy protection, organizations have had to adapt to regulatory standards to capture and govern consent. Yet, the real-world implications of what this looks like in practice are chaotic, inconsistent, and not always clearly understood. Join this session to learn about the various versions of “consent” and guidance on how you can apply this to your organization.

## **Panelists:**

Heather Federman, VP of Privacy & Policy, BigID

Amanda Witt, Partner, Kilpatrick Townsend

Ami Rodrigues, Assistant General Counsel, Chipotle Mexican Grill
