Services

Intellectual Property
Patents
Asset Creation - Prosecution &
Counseling

Industries

Health & Life Sciences
Medical & Surgical Devices

Kenneth Weber, Ph.D., focuses his practice on patent prosecution, particularly in the areas of molecular genetics, chemistry, pharmaceuticals, plant and agricultural sciences, medical devices, and microbial genetics. He regularly assists clients in patent portfolio management, due diligence reviews, validity/infringement opinions and licensing.

Dr. Weber's clients include public and private corporations across the United States. Representative corporate clients include Aqua Bounty Technologies, University of Chicago and University of Texas, Grimmway Farms, Biosensors International Group, and Sun-Maid Growers. Representative clients in the bay area include Corcept Therapeutics, Kalobios Pharmaceuticals, Osel, and Sutro Biopharma.

Dr. Weber provides a unique, collaborative approach to creating patent strategies for companies with weak patent estates. Born out of years of evaluating startups for investors, and creating patent prosecution strategies for clients with repurposed drugs or non-inventive medical devices, Dr. Weber's proactive legal counsel maximizes the opportunity to extract patentable inventions from routine experimentation and engineering work.

Dr. Weber was recognized in 2021 and the five years immediately preceding by *The Best Lawyers in America*[®] for Biotechnology and Life Sciences Law.
