

KT Patent Prosecution Extranet

Collaborative Advantage

Having real-time access to your patent portfolio can streamline legal operations and give you a strategic advantage over competitors. At Kilpatrick Townsend, clients can independently monitor their portfolio assets 24/7/365 by computer, smart phone, and/or tablet using our patent-pending, state-of-the-art [KT Extranet](#). Our client-centered solution organizes and displays patent portfolio data the way that companies manage it — in the paradigm of families or groups of families. It allows clients to view, analyze, and export information into meaningful and visually-compelling company reports and presentations (via spreadsheets, charts, graphs, images, tables, etc.) for a 360-degree perspective. As such, clients can leverage their portfolio data more efficiently and cost-effectively in an up-to-date, user-friendly environment that fosters attorney-client transparency, collaboration, and more informed decision-making.

Key Features

- Executive Summary of Issued & Pending Patents, including cumulative totals and specific geographic coverage
- Itemized Patent Lists & Visually-Compelling Patent Family Trees
- Status Reports, Calendar with Task/Deadline Alerts & Docket Information
- Report Generation & Downloadable/Exportable Data
- Real-Time Information 24/7/365
