Kilpatrick Townsend’s Jon Neiditz to Speak at ITechLaw 2013 European Conference

ATLANTA (September 20) – Kilpatrick Townsend & Stockton announced today that Partner Jon Neiditz will speak at the ITechLaw 2013 European Conference, which will be held October 2-4 in Amsterdam.

The ITechLaw 2013 European Conference, led by many of the world’s leading technology lawyers, includes panels on mobile payment systems, outsourcing and cloud, data protection, IP, regulatory developments, and a look at technology innovations on the horizon. Delegates from over 50 countries will be attending.

“Europe and the United States face extremely difficult issues right now about the appropriate uses of data and information, and nowhere more than in cloud computing,” Mr. Neiditz noted, and the ITechLaw 2013 European conference is one of the world forums in which those issues will be most intelligently and productively addressed.” Cloud computing is the topic of his panel.

Mr. Neiditz leads the Big Data, Privacy and Information Security practice at Kilpatrick Townsend, a firm that has become one of the leading information law firms in the world. Previously, he has led information management practices at other major law and consulting firms, and served as an in-house general counsel and a special advisor to reform initiatives. Mr. Neiditz provides practical and uniquely inexpensive ways of dealing with security breaches and privacy issues while increasing customer trust, and of getting value from information through big data and knowledge management. He is passionate about customer service and innovation. Mr. Neiditz is also a leading national commentator and influencer in information management and governance, big data and mobile device management.

In his Big Data Tech Law Blog: blognetwork.kilpatricktownsend.com/bigdatatechlawblog and on Twitter (@jonneiditz) and LinkedIn (linkedin.com/in/informationmanagementlaw), Mr. Neiditz has devoted a lot of attention recently to opportunities for better, more big data-friendly global privacy rules for cloud vendors and others that can be created as a result of the NSA disclosures.
